

What are Luxury Call Buttons?

With guests demanding the best service available, businesses need more efficient ways of meeting those demands

It is easy for guests to request staff for service or assistance without having to look for them.

These Luxury call buttons are perfect for high-end restaurants, hotels, bars and other quality establishments.

The highest quality materials have been used throughout and these call buttons work with LRS pagers. Every aspect of this button can be customised so that it meets your exact requirements.

The luxury buttons, as opposed to other call buttons on the market, can be used with our range of extenders and other optional equipment for a full complement of high-end features.

Luxury Call Button Designs :

We offer multiple designs of call buttons that can be customised to suit your requirements.

This call button has the simple push button in the middle that allows guests to call for staff. The small design means that it can be conveniently or discreetly placed anywhere in your building.

This luxury call button really does compliment the luxurious decor inside yachts, restaurants, hotels, bars and many other establishments.

Luxury Call Button Designs :

This is one of our larger luxury call buttons that is available. Add custom text to the top and offer your guests/clients an easy method to contact staff immediately.

When the button is pressed, it immediately alerts staff of the exact location of the call. Ensure that your guests are never left waiting for service. Call buttons will enhance your guests' experience and staff's performance.

This luxury call button really does compliment the luxurious decor inside yachts, restaurants, hotels, bars and many other establishments.

Luxury Call Button Designs :

One of our most popular call button out of our luxury collection.

This small compact call button is perfect for high end restaurants, super yachts, bars and other quality venues. Guests can easily recall staff for service instantly, without the trouble of having to look for staff.

This call button is very unique and is in fact the only one of its kind on the market.

Available in a range of colours, the call button can be completely customised to your needs, from the casing to the actual button itself...invest in a luxurious call button that compliments the décor in your establishment.

Highest quality materials have been used throughout and these call buttons work with LRS pagers.

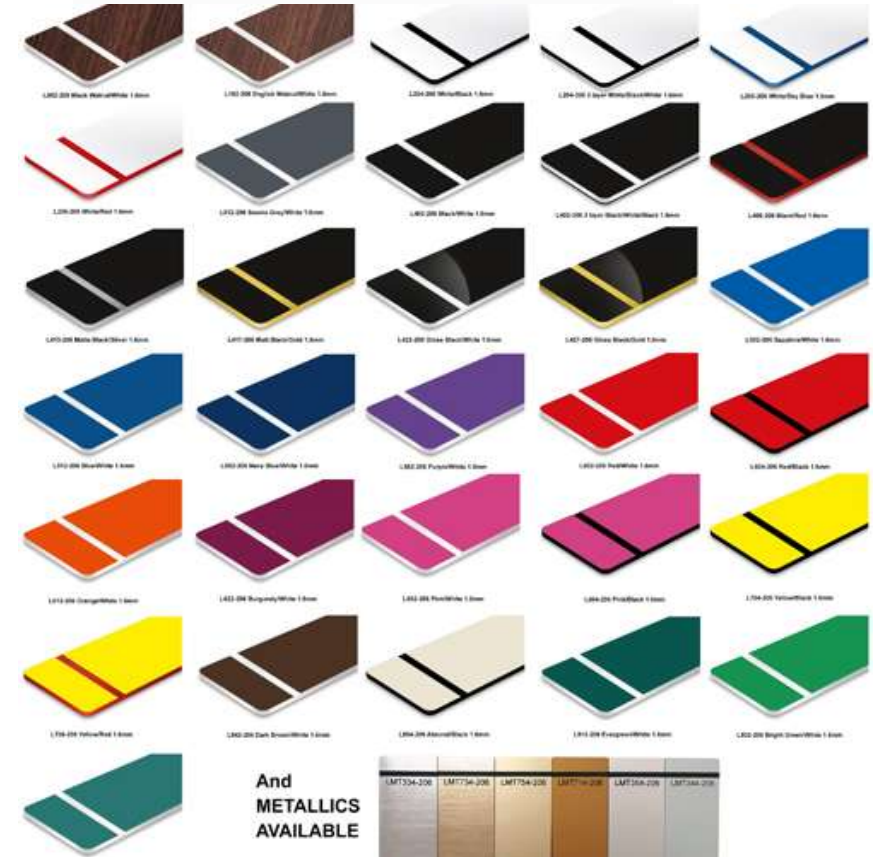

Luxury Call Button Customisation :

The luxury collection Call Buttons.

Create your own call buttons that compliment your luxurious decor! There are a variety of colors to choose from, so the call button will be a perfect match for your establishment.

All call buttons within the luxurious collection can be made unique to your establishment. Please call us for more information on customizing your call button.

Highest quality materials have been used throughout and these call buttons work with LRS pagers.

Call buttons and Staff pagers

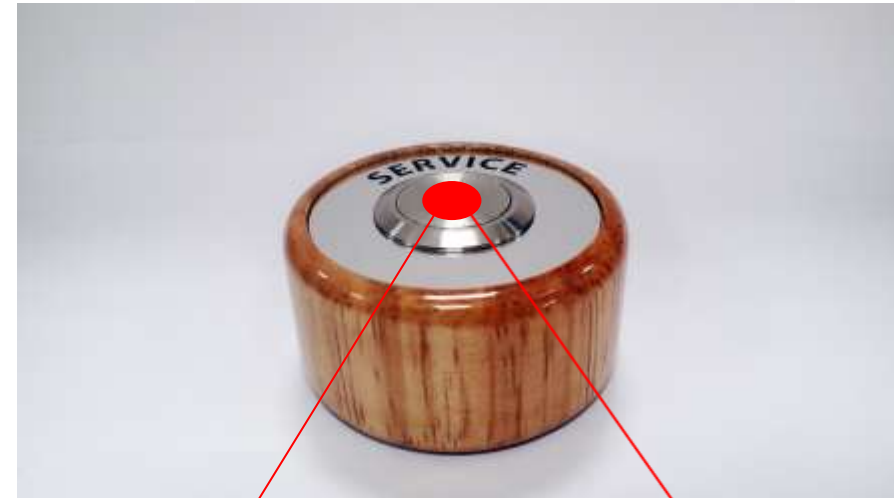

As soon as the button in the centre is pressed, it immediately pages either an LRS AP2 alpha pager or our watch pager system.

Both will display the location and reason for the call, allowing staff to quickly respond.

The AP2 line alpha pager can be worn on a belt clip or fits in pockets, and staff will feel the vibration when it is paged.

The watch pager sits comfortably on the wrist and staff can easily view the page.

Choosing your staff pagers depends on which pager will be more effective for your staff and workflow.
