LONG RANGE SYSTEMS UK LTD

Security Paging

OEM-TX SECURITY SYSTEM

OEM-TX SECURITY BOARD

The LRS UK OEM-TX 7 contact transmitter board connects to up to seven open-closed or closed-open sensors. When any sensor changes state, it outputs a message to an alphanumeric pager; its buffer prevents loss of subsequent switching, and messages are fully programmable. Manufactured by Capture Technologies Ltd.

Range is around 100 metres depending on the environment, but an LRS signal booster repeater increases the range up to two miles in open air. This product is not available from any other company, including other LRS offices.

Features:

- 7 Dry contacts
- 5-24 volts power
- Fully programmable
- Used throughout industry as well as fire alarms, security systems and many more uses.
- Low cost for this level of technology
- Small footprint
- Fully CE compliant
- 3-YEAR MANUFACTURER'S DEFECT WARRANTY

Security Paging Solutions

Reliable, effective communications that protect staff and customers are essential, and using the best available solutions at a great price is a must. After all, lives could be at risk with inadequate security communications

Below are some security solutions from 'Pagers for Sale', but we also offer many other options, including most wireless two-way radios.

AP-2 SECURITY PAGING SYSTEM

AP-2 ALPHA SECURITY PAGER SYSTEM

LRS Vibe+ pager is the replacement of the 4-line alpha with massive improvements. The AP2 Vibe+ is a full-colour backlit pager that displays scrollable text for improved readability.

Used to notify staff that they are needed, and can be used in all industries where staff need to stay in communication. Vibe+, when used with the TX7471 transmitter, can be pre-programmed with preset messages that can be selected on the transmitter and delivered to an individual or group.
