

Two-way Radios

LRS UK

Branded Radios

- Motorola
- Kenwood
- Hytera
- ICOM
- Opus

From Leisure Radios to ATEX Radios

No matter what you need, we have you covered with a wide range of Motorola Radios!

Choosing the right wireless radio is critical to both business operations and to safety of employees. Choices are often not about costs but rather the right two-way device for the job. If working in noisy areas its essential to receive crystal clear audio and clear uninterrupted reception but in quieter areas a different handset is probably more suited.

Motorola are one of the largest two-way radio makers in the world. They have extensive experience in this field and we at LRS UK partner with them. The right handset is the difference between communications that work flawlessly or a communications system that is hit and miss.

Robust and reliable equipment will make sure that your system operates to maximum efficiency. Staff will be happy to trust the communications whatever the circumstances.

- Easy to use and learn
- Compact and portable design
- Noise cancellation and background suppression
- Clear audio quality
- Versatile and customizable features
- Multiple communication channels

ENTEL WIRELESS TWO WAY RADIO HANDSETS

Waterproof/Submersible and LTE PoC Portable Radios

The high quality of Entel communications devices ensures that they are robust for any operational environment. Since 1995 Entel have created incredible technology for communications in business and leisure. Importantly they also have created waterproof and ATEX standards of wireless handsets that are very hard to beat both in features and technologies used in production; new technology includes LTE PoC radios that enhance what normal equipment cannot achieve.

Entel warranty, They offer a two year warranty on handsets and bearing in mind how some radio equipment gets handled that 2 year guarantee is actually a very welcome addition compared to many other brands.

Equipment for most types of use is available - license free or licensed, analogue or digital, or the new LTE PoC radios for lone worker and man-down safety, for example, waterproof handsets for marine use and ATEX standards portable wireless handsets for use in hazardous areas of work. Entel wireless radio equipment is robust and certainly up to the operational use for most users. Receive crystal clear audio as good if not better than any other brand - a contributing factor for their incredible success.

HYTERA WIRELESS TWO WAY RADIO HANDSETS

Hytera 2 Way Radios PMR446, Licensed and ATEX

We supply Hytera Two way radios here at LRS UK. Improve staff productivity and keep all customers, patients and staff safe whilst in your work place. Hytera are the global leader in business two way communications so you can be assured that you are looking in the right place for quality, reliable and robust two way radio solutions for your business.

If you need lone worker ability then the Hytera handles those features admirably. But we find that the biggest single feature why customers buy this brand is the compatibility with analogue radios. There are licensed and license free handsets available covering personal and business use right through to specialised equipment for hazardous areas of work and more.

With years of development in dedicated network communications, Hytera has been launching products and solutions for industries such as public safety, public utilities, big transport, emergency and rescue, and commerce. In addition, it also offers customers in-depth customizable solutions based on industry sector.

- Excellent audio quality for clear and crisp communication
- Enhanced coverage with advanced signal processing technology
- Durable construction to withstand harsh environments
- Long-lasting battery life for extended usage
- Versatile features such as GPS tracking, text messaging, and voice recording
- Advanced encryption for secure and private communication
- IP67-rated waterproof and dustproof designs for outdoor use
- Integrated emergency features for quick response in critical situations

KENWOOD TWO WAY RADIOS Portable Radios

Quality Radios PMR446, Licensed and ATEX

Everyone has heard of Kenwood! They make car electronics, dash cam's, headphones and communication solutions which is what we're interested in here. And Kenwood make a great range of portable 2 way radios for most uses. Kenwood has in fact been making products since back in 1955 and in 1958 started making products for the radio amateur markets. If you can think of it, Kenwood have it! From analogue or digital operation (or dual mode), licensed or license free, VHF or UHF frequency operation, ATEX safe long range wireless radios, amateur as we already mentioned and of course all of the accessories and support you could ever need.

With the introduction of the NX-1300 and NX-3300 solutions, Kenwood has added multi protocol capability and they confirm that those radios are 'future proof' by design. The DMR hand-portables, mobiles and repeaters, offer many advanced features and functions that allows you to build a digital two-way communications solution that's exactly correct for your use; from simple peer-to-peer communication by voice, IP enabled voice and data systems for mission, operations or commercial critical applications are all available from Kenwood.

<https://twowayradiosuk.co.uk/Pages/portfolio-kenwood-selector.htm>

BENEFITS

KENWOOD RADIOS

- Diverse range of Kenwood radio models
- Clear and reliable audio quality
- Extensive coverage range
- Robust and rugged construction
- Long battery life
- Multiple channels and talk groups
- Compact and lightweight designs
- Enhanced privacy features
- Emergency alert functions
- Wide compatibility with other radio systems and accessories
- Intuitive and user-friendly interface
- High-quality displays for easy navigation and information viewing
- Advanced noise cancellation technology for clear communication in noisy environments
- Programmable buttons for quick access to frequently used features

ICOM WIRELESS TWO-WAY RADIO HANDSETS

ICOM dPMR446 and PMR446 and Licensed 2 way Radios

The ICOM brand is one of the foundations of wireless radio communications and they manufacture 2 way portable and mobile radios for many sectors of business. LRS does not have a huge range of ICOM radios as you can see below, but what are on offer are some of the better handsets that ICOM has to offer. ICOM are also known for their marine and amateur radio equipment and its fair to say that for those sectors that ICOM is one of the top providers of high quality equipment.

On offer are a number of genuine long range radios for either licenced use or license free (PMR446 or dPMR446) use. Bear in mind that the licensed units are always more powerful than the license free units and licensed radios can often reach 8Km in open air. You will also see VHF and UHF radios available as well as digital and analogue units. Be aware that the same model number can be ordered for many different options. For example the F1000 is a model, but that then has to be specified as license free or licensed and analogue or digital two-way radio! Its an anomaly that customers have to bear in mind when ordering these ICOM units.

For a full list of ICOM radios we supply please visit-

<https://twowayradiosuk.co.uk/Pages/portfolio-icom-selector.htm>

BENEFITS

ICOM RADIOS

- Wide range of Icom radio models to cater to diverse communication needs
- Exceptional audio quality for clear and crisp communication
- Extensive coverage range for communication over long distances
- Rugged and durable construction for reliable performance in challenging environments
- Long-lasting battery life for extended usage in the field
- Multiple channels and talk groups for efficient team communication
- Intuitive and user-friendly interface for easy operation
- Enhanced privacy features, including voice encryption
- Emergency alert functions for immediate response in critical situations
- IPX7 waterproof rating for reliable operation in wet conditions

OPUS WIRELESS TWO-WAY RADIO HANDSETS

Quality Low Cost Two-way Radios

Opus brands are high specification and low cost. While that might seem unachievable, we have sold these two brands for many years and had no problems. The brand is a perfect communications radio for near enough every sector of company. If you are looking for high performance equipment that has very functional designs and is particularly robust then these radio series are a great choice for licensed or license free and analogue or digital two way radios. If you use PMR446 radios then the Opus T6 is a great radio for an impressive price. But in the same context the T6 is a great portable handset for business use where power is needed.

The best thing about Opus is that they are simple to operate unlike some brands and simplicity usually means that the hand set will get full use as opposed to something otherwise over complicated where users might be confused about use. Having radios that no one can master would of course be a recipe for poor communications. We have sold the Opus brand to many sectors of business and have yet to find ANY customer that does not like them. Backed up with a UK warranty and are compatible with Motorola accessories in general helps to make things simple if you are looking for specific additional components. These portable 2 way radio handsets can be fully configured under software to offer other options as necessary for your business.

<https://twowayradiosuk.co.uk/Pages/portfolio-hqt-selector.htm>

BENEFITS

OPUS RADIOS

- Instant and direct communication
- Reliable communication in various environments
- Enhanced coordination and collaboration within teams
- Increased efficiency and productivity
- Cost-effective compared to recurring charges of cellular networks
- No reliance on external infrastructure like cellular or Wi-Fi networks
- Wide coverage range, especially in remote areas
- Durability and ruggedness for use in challenging conditions
- Hands-free operation for convenience and safety
- Secure and private communication channels
- Quick and easy deployment
- Versatility and compatibility with other communication systems
- Long battery life for extended usage
- Weatherproof and dustproof designs for outdoor use
